Note to the performers:

The performers are encouraged to seek comparisons with any available Urtext edition of these pieces in order to render these arrangements as authentically as possible. The metronome markings are only suggestions of mine.

A special note to the pianist: Pedal markings are generally avoided in these scores. Please feel free to use the pedals in this music as you wish. It is common knowledge among pianists that the best pedaling strategies are far too complicated and personal to be notated accurately in the score. Thus, consider the instruction, *con pedale a piacere*, to be applicable in every single measure.
